

Name: Fatima Aftab

Semester: SP23-BSE-6B

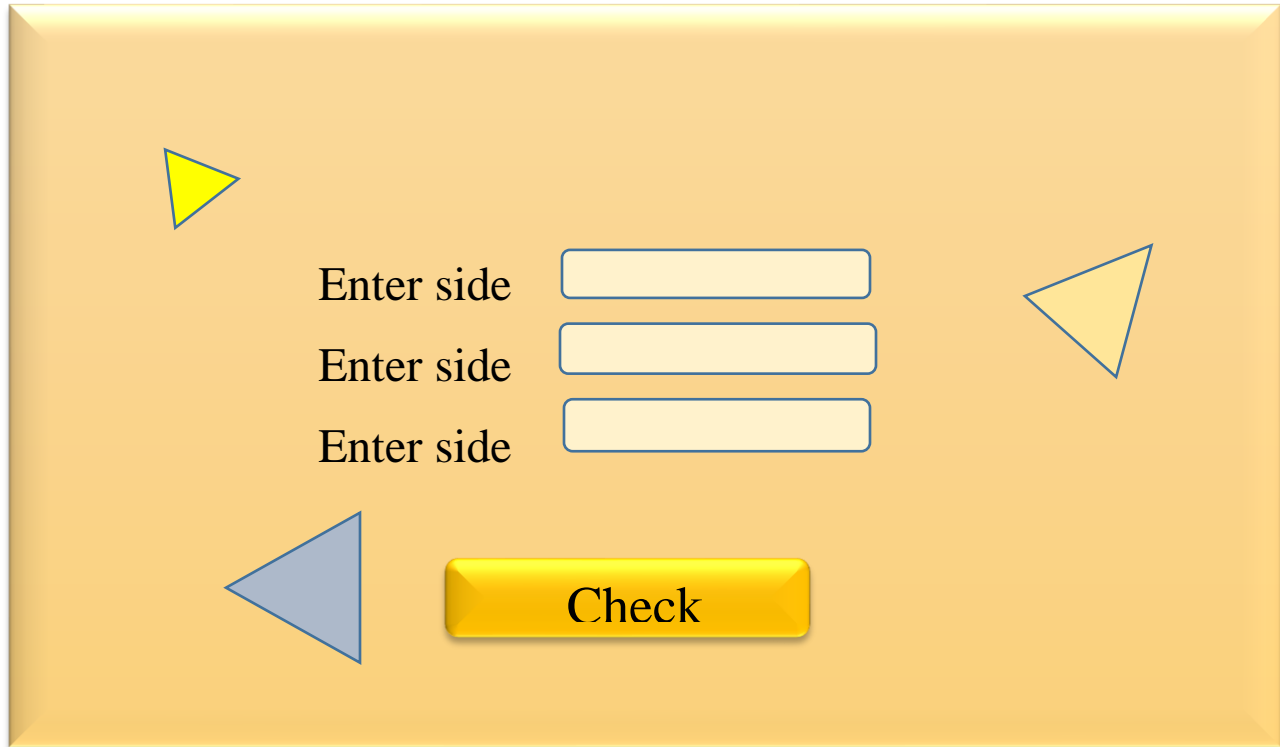

Course: Software Testing

Title: Lab Task 1

Teacher: Sir Mukhtiar Zamin

# Lab Task#1 Exercise

Screen:

The screenshot shows a software interface for classifying triangles. It features a yellow background with three yellow triangles and one blue triangle. The text 'Enter side' is repeated three times, each followed by a text input field. Below these fields is a yellow button labeled 'Check'.

Scenario:

Make test cases for a triangle that can differentiate between isosceles, equilateral, and scalene types based on sides' length as input and state if their verdict is true/false. Make assumptions for actual outcome.

We have 3 sides a, b and c of triangles

Test Case ID	Test Case Description	Input Data	Expected Outcome	Actual Outcome	Status
TC_01	To display "triangle is equilateral triangle"	Enter 3 sides that are equal, a=b=c a=4 b=4 c=4	Message: Equilateral triangle		
TC_02	To display "Triangle is isosceles triangle"	Enter 3 sides in which 2 sides are equal a=b a=6 b=6 c=8	Message: Isosceles triangle		
TC_03	To display "Triangle is	Enter 3 sides that are not	Message: scalene		

	scalene triangle”	equal to each other a!=b, b!=c a!=c a=3 b=2 c=9	triangle		
TC_04	To display “invalid values “for side equal to zero	Enter sides in which 1 or more side is one a=0 b=9 c=6	Message: Invalid values		
TC_05	To display “not a triangle” for all sides equal to zero	Enter all sides equal to zero a=0 b=0 c=0	Message: “Not a triangle”		
TC_06	To display “Enter values” for empty fields	a= b=5 c=	Message: “Enter values”		
TC_07	To display “invalid values” if sides are negative	a=9 b=5 c= -5	Message: :Invalid values”		
TC_08	To display “Enter numeric value in fields” for values other than numbers.	Enter character or symbols for sides a=% b=j c=*	Message: “Enter numeric value in fields”		
TC_09	To display triangle name for float values	Enter a=7.9 b=7.6 c=8.5	Message: “Scalene triangle”
