NAME:

FATIMA AFTAB

REGISTRATION NO:

FA21-BSE-088

ASSIGNMENT:

LAB FINAL TERM

DATE OF SUBMISSION:

5th JULY 2024

Question#1

Pick any Algorithm of your choice and using EP and BVA write 5 Test Cases and automate with Junit.

Answer#1

1.1. Algorithm

My algorithm is a simple algorithm in which we give 4 sides of shape width1, width2, height1 and height2 it will give the name of that shape (square or rectangle).

1.2. EP

Invalid Inputs	Valid Inputs
Negative sides	Equal sides
Empty sides	Opposite sides equal
Side=0	
Any special character	

1.3. BVA

Boundaries	Inputs(sides)
Sides>0	3,3,4,4
Sides=0	0,0,0,0
Side<0	-3, -3, -4, -4

1.4. Test Cases

TC_ID	Description	Input	Expected Outcome	Actual Outcome	Status	Analysis type
TC_01	To display that given shape is a square	W1=3, W2=3, H1=3, H2=3	Message shown "Given shape is a square"	Message shown "Given shape is a square"	Pass	EP, BVA
TC_02	To display that given shape is a rectangle	W1=3, W2=3, H1=4, H2=4	Message shown "Given shape is a rectangle"	Message shown "Given shape is a rectangle"	Pass	EP, BVA
TC_03	To display that given sides are invalid if sides<0	W1=-3, W2=-3, H1=4, H2=4	Message shown "Invalid sides neither square nor rectangle"	Message shown "Invalid sides neither square nor rectangle"	Pass	EP, BVA
TC_04	To display that given	W1=1, W2=b,	Invalid Input	Exception	Fail	EP

	sides are in valid when we enter special characters	H1=c, H2=d				
TC_05	To display that side are invalid when input sides are zero	W1=0, W2=0, H1=4, H2=4	Message shown “Invalid sides neither square nor rectangle”	Message shown “Invalid sides neither square nor rectangle”	Pass	EP, BVA
